S2000 Series Scanners
Presentation Pack

About this document:

- This set of slides is cleared for external use with customers, partners and other interested parties
- Slides from this collection should be combined with others to tailor for your target audience (customer types, influencers, prospective employees, geographies, key messages)
- Be sure you use the best possible set of local facts and figures to convince each particular audience
- If you need further material for customer or external presentations, please contact your cluster or regional marketing director

Presentation tips:

- Use the Home key on your keyboard to bring up slideshow control icons on the lower left of your screen. The icons allow you to navigate through slides (arrows), write on slides for emphasis (pencil icon), and control display and end slideshow mode (box icon).
- In slideshow mode, use right/left arrow, up/down arrow, or page up/page down keys on your keyboard to move through slides.
- Text on the pages underlined in blue will lead you to more information on that topic. Use the Last Viewed icon in the upper right hand corner to return to a slide if you use a hyperlink to share more information on a feature.
- Slide 21 has a table of contents with links to feature slides in the Appendix that you can use to present specific features in more detail. The house icon in the upper right corner of the feature slides will take you back to the linked table of contents on slide 21.

INFORMATION CAPTURE AT THE POINT OF ENTRY

Alaris S2000 Series Scanners
September, 2018

Alaris
a Kodak Alaris business

THE CHALLENGE

Digital business processes
often begin with paper documents
that originate in multiple locations.

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

THE CHALLENGE

You need an easy, accurate way to capture document information wherever it first touches the business.

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

THE SOLUTION

NEW ALARIS S2000 SERIES SCANNERS

USB, Network / Wireless connectivity to match your business needs

RIGHT FIT

Compact, powerful, easy to use

RIGHT EXPERIENCE

Designed to streamline and optimize the workflow process

RIGHT RESULTS

Superior image quality, paper handling and information accuracy

Alaris
a Kodak Alaris business

RIGHT FIT

Scanning at the point of capture is not your employees' primary job

The right capture solution needs to be:

- **Simple** to setup so you are up and running quickly
- **Intuitive** and easy to learn so anyone can use it
- **Personalized** and easy to route documents to the right location
- The **right technology** to integrate into your environment

Alaris
a Kodak Alaris business

RIGHT EXPERIENCE

You face challenges from inefficient, manual document workflows

Inefficient, paper-based workflows:

- **Waste money** from slow, manual processes and the cost of longer time to revenue
- **Add time** from manually routing or rekeying information, and dealing with error and exception handling
- **Make collaboration more challenging** and reduce customer satisfaction

EXCEPTIONAL PAPER HANDLING

Reliability built into the entire paper path

Active Feed Technology

- Spend less time arranging documents to feed
- Automatic jogging to avoid paper misfeed, multifeed and need to rescan

VIEW VIDEO

SurePath Paper Handling

- Compact and short transport
- Feeder registration gates
- Automatically adjusts for various thicknesses and sizes
- Multifeed Management Options

Controlled Output Stacking

- Spend less time adjusting documents
- Load diverse mix of documents
- Ability to pause/resume scanning
- Controlled Output Stacking

Integrated Passport Flatbed Scanner

- Scanner detects documents when fully put on the platen
- Completes a passport scan in **seconds**

S2000 Series & the Alaris IN2 Ecosystem Promise

RIGHT FIT

ALARIS S2000 SCANNERS PROVIDE:

- For the innovative businesses that need to integrate with modern browser/ cloud applications, S2000 scanners provide Zero footprint driver-less integration with Web API
- Alaris Smart Touch modern user interface ensures minimal training and enhanced productivity for your users
- One-Touch easy job control for single users or multiple users on a shared network device
- Choose a model that fits your budget needs today yet future proof your investment for tomorrow

RIGHT EXPERIENCE

ALARIS S2000 SCANNERS PROVIDE:

- Intelligent Exception Handling catches errors so you can fix them at the point of transaction
- Intelligent Job Select switches to the appropriate job and/or profile, then continues scanning when it encounters a feature patch sheet
- Built in Intelligent Barcode Reading produces the most accurate data extraction results
- Bundled Capture Pro LE software allows for sending of smarter information to ECM systems, Microsoft SharePoint, and secure FTP to simplify workflow and processes.

RIGHT RESULTS

ALARIS S2000 SCANNERS PROVIDE:

- Perfect Page Image Processing optimizes and produces accurate document capture
- Embedded image processing saves your valuable IT budget with less powerful PC's required for scanning
- Integrated Passport Flatbed ensures almost no disruption in your customer interaction while capturing sensitive customer information
- Active Feed Technology lets you focus on your customer while the scanner prepares your documents
- Secures your scans over a network with HTTPS, WPA Enterprise, TLS encryption standards

Faster, easier scanning leaves

MORE TIME FOR BUSINESS

Handles more of the work traditionally done by people, computers and mobile devices.

- **Embedded Image Processing** delivers crisp, high-quality images without depending on your computer
- **Active Feed** aligns leading edge of paper to avoid misfeeds and multifeeds
- **Controlled Output Stacking** places paper neatly in the output tray
- **Perfect Page technology** optimizes image quality dynamically for every page for more accurate information extraction

Alaris
a Kodak Alaris business

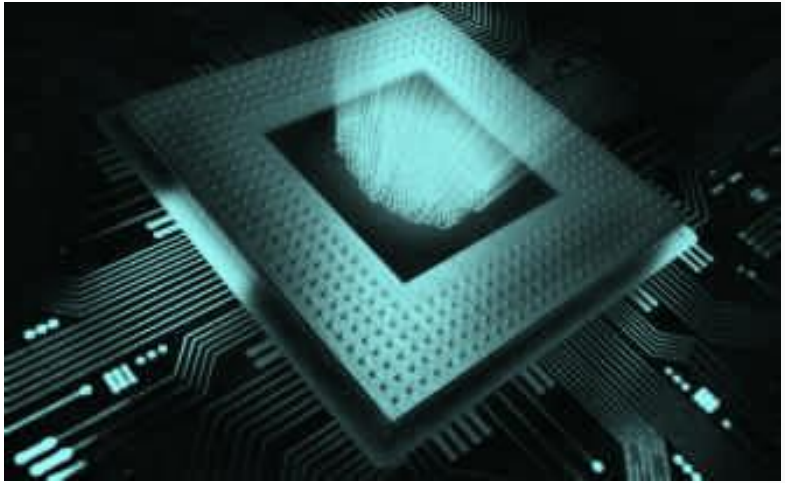
EMBEDDED IMAGE PROCESSING

Embedded image processing in the scanner takes away dependence on host processing

- Built-in Processor
  - S2040 / S2050 – Single Core
  - S2070 / S2060w / S2080w – Dual Core
- Scanner gets the job done at rated throughput with no dependence on host
- Delivers crisp, high-quality images compressed out of the box
- Enables quick startup (time to first scan) so you remain productive
- Ideal Scanner for cloud / terminal-based solutions since they don't need powerful desktops to run S2000 Scanners



VIEW VIDEO

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

ACTIVE FEED TECHNOLOGY

We take care of document preparation so that you can focus on what's important to you

- Spend less time arranging documents to feed
- Scanner jogs the documents to align the leading edge so you can avoid misfeeds
- Help prevent multifeed and need to rescan

VIEW VIDEO

Alaris
a Kodak Alaris business

PERFECT PAGE TECHNOLOGY

Improve image quality with 30+ enhancement functions

Expect crisp, clear images no matter how challenging your originals may be

- **Perfect Page** technology optimizes image quality and intelligently manages a host of image processing tasks – automatically – with every scan
- Capture even the smallest details accurately by filtering out streaks and page markings
- Sharper images make additional processing functions, such as Optical Character Recognition (OCR), easier and more accurate

© 2018 Kodak Alaris Inc.

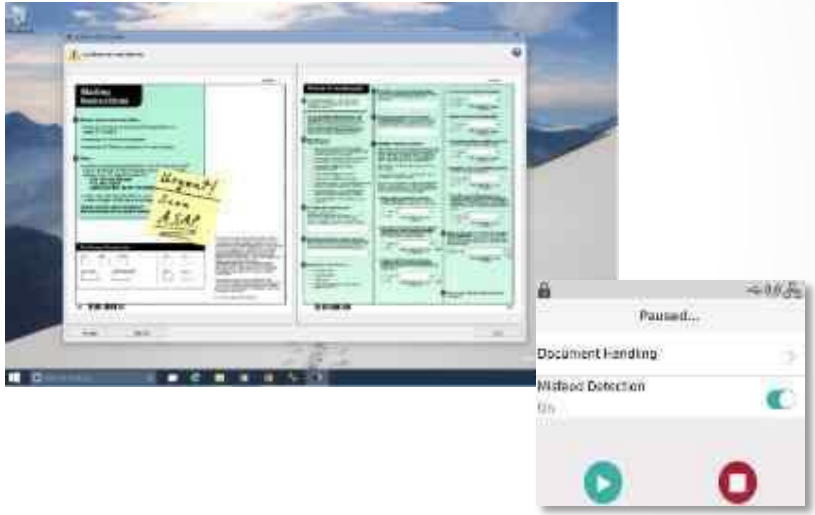
Alaris
a Kodak Alaris business

MULTIFEED MANAGEMENT OPTIONS

More productive performance

Speed through large jobs with time-saving features

- Resolve multifeeds with image display on the PC
- Quickly choose to accept, ignore or rescan images before sending to the application
- See acceptable multifeeds coming and let them pass without pausing
- Speedy recovery from stoppages with just pause and resume at scanner rather than interact with host



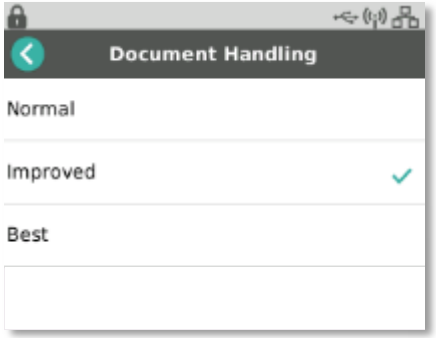
© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

CONTROLLED OUTPUT STACKING

Document handling versatility you need so you can focus on your business, not clearing the mess

- Spend less time adjusting documents – Controlled Stacking technology keeps documents neatly lined up
- Load any diverse mix of documents – including fragile and extra thick originals
- On demand job control that allows you to pause and resume scanning to control your output stacking for difficult documents



© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

Document and information

HANDLING YOU CAN TRUST

Ensure reliable data quality at the point of capture through a combined approach of hardware and software technologies.

- **Intelligent Exception Processing** catches information errors to fix at the point of transaction
- **Intelligent Document Protection** “listens” for a telltale crumpling sound and immediately stops the scanning process
- Support for industry standard **enterprise network security** protocols protects document images and data in transit

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

INTELLIGENT EXCEPTION HANDLING

Maximize process efficiency with accurate capture at the point of customer interaction

Keep documents coming and streamline your workflow

- Combines Alaris scanners and Alaris software features to automatically check scanned pages for customer-defined exceptions
- Examples include signature detection*, document type validation, value amounts*, and more
- Scanning is paused to allow issue resolution at point of input
- Prep work is reduced – no need to manually check documents for exceptions prior to scanning
- Ensure all necessary information is collected at time of customer interaction preventing delays in downstream processing

***Alaris Capture Pro only**

VIEW VIDEO

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

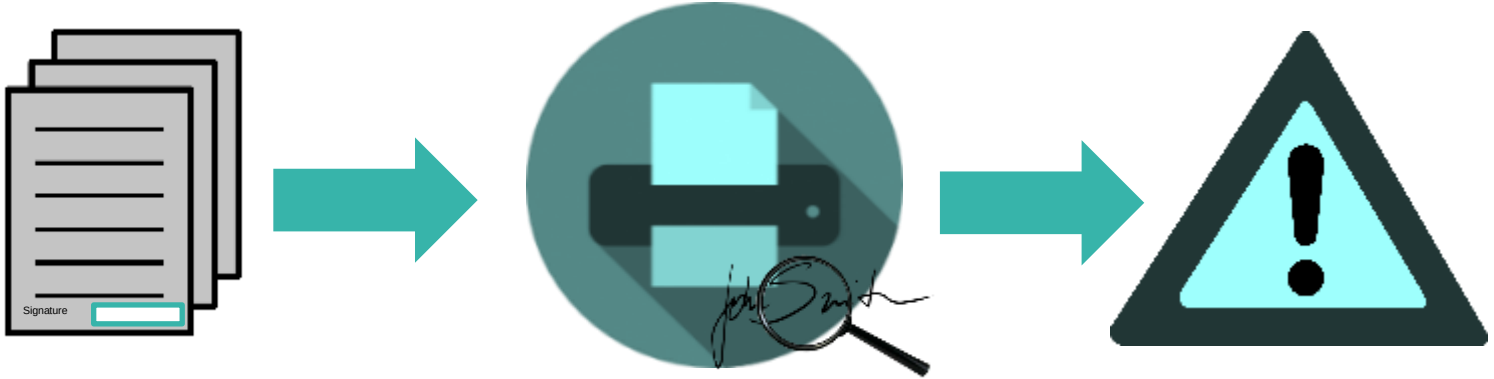
INTELLIGENT EXCEPTION HANDLING EXAMPLE

Spot unfinished paperwork in real time

Applications require signatures

Detect whether the application is signed or not

Warn employees of unfinished paperwork in real time



- Improve the processing time by detecting errors in applications in real time
- Improve customer satisfaction by doing things right the first time

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

INTELLIGENT DOCUMENT PROTECTION

Protect valuable documents with scanning that's virtually damage-free

- Scanner "listens" for telltale crumpling sound and immediately stops the scanning process
- Ensures documents are preserved for accurate data and image capture

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

SUREPATH PAPER HANDLING

Smooth paper transport path from input to output

- Compact and short transport
- Feeder registration gates ensure users don't' push the document too much into the feeder causing a misfeed
- Virtually jam-free and document-damage free
- Documents fly through the scanner with control and ease
- Automatically adjusts for various thicknesses and sizes
- Actively monitors for multifeeds with ultrasonic sensors and intelligent document protection to prevent damages in the rare event of a jam

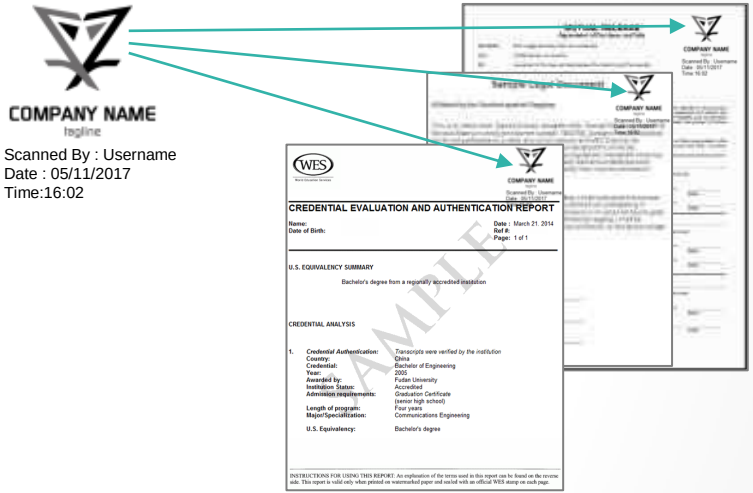
© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

DIGITAL STAMPING

Add your unique identity and information to your scanned documents

- Set up specific imaging profile in your driver to upload custom logos with up to 3 lines of text
- Logos and text can be digitally imprinted to documents with adjustable color and transparency
- Custom logos are embedded as part of every scanned image, giving images unique identity
- Also add date, time stamps and page counter from system values that are programmatically controlled



© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

ENTERPRISE NETWORK SECURITY

Supporting industry standard enterprise security protocols for scanning over networks

- HTTPS : Enable HTTPS scanning with our Restful WEB API, securing scanned images between host and scanner when scanning over a network.
- WPA Enterprise : Wi-Fi Protected Access is standard network protocol used in enterprises, helping enhanced secure scanning over wireless networks.
- TLS Encryption : Transport Layer Security protocol aims primarily to provide privacy and data integrity between two communicating computer applications.

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

DATA SECURITY

Protect customer information

Alaris Scanners process scanned data exclusively through volatile memory

- Volatile memory is used to store customer image data and is erased when the device is turned off
- Non-volatile memory is used to store program data, scanner settings, and scanner calibration data
- No customer image data is stored in non-volatile memory

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

Information capture to

STREAMLINE YOUR BUSINESS PROCESSES

- **Intelligent Barcode Reading** produces the most accurate data extraction results
- **Bundled software** lets users search and find captured documents in a flash
- **Mobile scanning** enables your workforce to capture documents from their mobile devices or tablets

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

INTELLIGENT BARCODE READING

Automatically optimize barcode processing to provide the fastest, most accurate results

- Up to 6 barcodes per page side are processed in the scanner
- Scanner barcode recognition accuracy is higher than software because uncompressed images are used inside the scanner
- Bundled Alaris Smart Touch recognizes the S2000 barcode capability and automatically uses the more accurate barcode
- This removes the guesswork of individual setups on scanner or software

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

BARCODE READING IN THE SCANNER

Produce the most accurate data extraction results

Scanning Barcodes

Barcode Recognition

Image Output

- Up to 6 barcodes per page side are processed in the scanner
- Scanner barcode recognition accuracy is higher than software because uncompressed images are used inside the scanner
- The small size of the output images saves on storage space as well as faster document retrieval

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

MOBILE SCANNING

Speed up life for your mobile workforce

Enabling high-quality document capture for your mobile workforce when they get access to an S2000w Scanner

- High-quality capture ensures the rest of the business process is frictionless
- Using the ScanMate+ app, scan from an S2000w Scanner directly to your mobile device or tablet
- Share via email, upload to an app
- For better centralized control of jobs, and for faster input to business processes, upgrade to Info Input Solution mobile application

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

SCAN TO CLOUD

Cloud friendly

Organize your documents in your favorite cloud applications.

- Scan directly to your mobile device to speed up processes using S2060w/S2080w models
- Simple to do using our browser-based capture application Info Input Portfolio
- Common repositories such as **Box, Evernote** or **SharePoint** are easily organized at the touch of a button using the bundled Alaris Smart Touch
- Embedded image processing makes it the most suitable device in market for any cloud / browser-based solution

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

ALARIS SMART TOUCH SOFTWARE

One Touch Simplicity

Eliminate complicated multi-step scanning processes and configure up to 9 different functions to fit your specific scanning needs.

- Automatically attach scanned documents to an email
- Create image only or searchable PDF files
- Scan documents into PDF, Microsoft Word, or image file formats
- Output to a folder or cloud service in many formats (TIFF, JPEG, BMP, PDF, sPDF and more)
- Print your documents on any networked office printer
- Send to common destinations like email, Microsoft Office, Adobe Acrobat, Microsoft SharePoint, etc.

Alaris
a Kodak Alaris business

Easy to set up

EASY TO USE

- Easy, icon-based color interface and one-button functionality make it easy to get the right information to the right place
- Bundled Alaris Smart Touch uses OCR (Optical Character Recognition) to enable easy and automatic data extraction
- Users can scan directly to cloud applications such as SHAREPOINT, BOX, GOOGLE DRIVE or EVERNOTE
- Range of scanners lets you connect via network cable or USB today and move to wireless scanning as business needs evolve

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

EASY NETWORK SETUP

Simple setup

Just print and scan the encrypted QR code created during the Easy Setup process.

- Select the configuration choices for your Alaris S2000w Scanner
- Print or save those choices to a secure Easy Setup page
- Scan that page to set up the scanner on the network configuration

Honored with an **Outstanding Achievement in Innovation** award by the analysts at BLI.

a Kodak Alaris business

INTUITIVE CONTROL PANEL MAKES IT EASY TO USE

Simple to use

The S2000 Scanner Series have intuitive display panels that make scanning tasks quick and easy for any user

- Informative messages help avoid or resolve errors, and show who is scanning
- S2040/S2050/S2070 models come with smaller color displays that are friendlier
- S2060w/S2080w models come with 3.5” color touchscreen display, making operations even easier and more intuitive

Alaris
a Kodak Alaris business

NETWORK SCANNING

Easy to share

More than one person can use S2000w network scanners:

- Up to 10 users can use a network scanner
- Great for collaborative, open plan offices and small work groups
- Connects to Enterprise Wireless Infrastructure
- Creates its own Wireless Access Point Ad Hoc network
- Connect via Ethernet or USB and change to wireless as business requirements evolve

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

INTELLIGENT JOB SELECT

Intelligent software from Alaris determines if the scanner can detect patch sheets. If it cannot, it's processed in the software. When the software encounters a feature patch sheet, it switches to the appropriate job and/or profile* then continues scanning.

This offers:

- Enhanced productivity by minimizing downtime between jobs
- Reduced chances of incorrect job and/or profile setups

***Alaris Capture Pro only**

Information capture that

EVOLVES WITH YOUR BUSINESS

Designed to fit seamlessly into your business and adapt as your needs change.

- Ideal for cloud and terminal-based solutions because a high-powered computer isn't required
- Deploy scanning using web APIs— no need to install drivers on the host PC, tablet, or mobile device
- A range of service plans can help you manage your scanner fleet in the most efficient, cost-effective way

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

ZERO FOOTPRINT DRIVERLESS SCANNING

Makes it simple to manage your scanner fleet

Managing a fleet of scanners can be a challenge, especially if you have to update drivers regularly for relevant OS updates.

- Integrate using our Web API with no drivers installed on the host PC, tablet or mobile device
- Combine with the power of our Info Input Software and you don't even need an application installed on your local desktops
- You get the power of efficient document capture through the browser with no software or drivers on local PC
- It also helps you secure your scanning with HTTPS protocol
- Feature available only on S2060w/S2080w models

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

FOLIO MODE

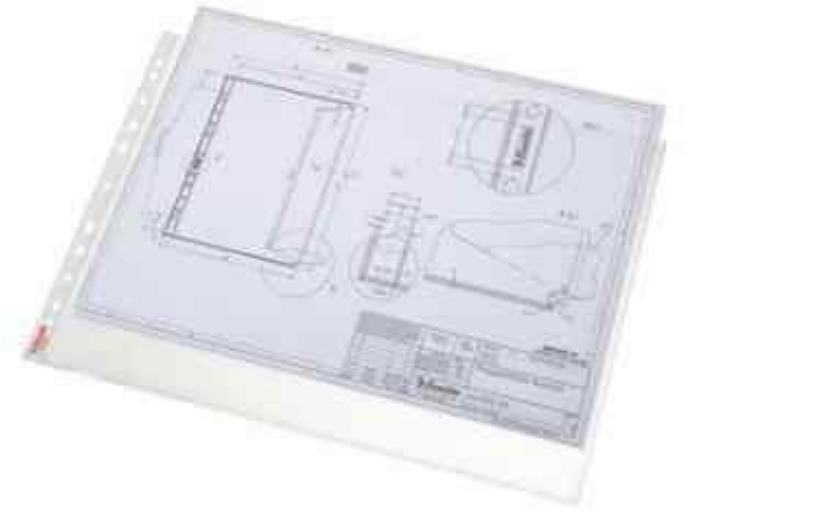
Expand the use of your scanners for exception documents

Scan A3 size documents on S2000 series A4 scanners

- Scanner detects transparent sleeve folio and automatically merges front and rear to create A3 image

Scan multiple small receipts in single pass

- Scanner detects sleeve and can automatically split each receipt into multiple images, or deliver one image with all receipts in a single pass



© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

INTEGRATED FLATBEDS

Expand the use of your scanners for exception documents like bound books or fragile documents

Easy Access Flatbeds are designed differently with the user and their productivity in mind. Helps capture exception documents as part of a document set quickly without changes to settings.

- Scan Passports / Passbooks using Integrated Passport Flatbed accessory available for the S2000 Series
- Scan up to Legal Size exception documents like folders, books or fragile documents using Integrated Legal Flatbed accessory

Integrated Passport Accessory

Integrated Legal Flatbed Accessory

© 2018 Kodak Alaris Inc.

Alaris
a Kodak Alaris business

INTEGRATED PASSPORT SCANNER

Integrated flatbed gives you an accurate and efficient scanning experience

- Scanner detects documents when fully put on the platen and completes a passport scan in approximately **2 seconds**
- Clever design that improves the productivity of the user
- Small footprint with the passport flatbed

Alaris S2000 vs Fujitsu Fi7xxx Scanners

COMPETITIVE

Top reasons to buy vs Fujitsu Fi7xxx

- Fully Embedded Image Processing on Alaris S2000 means lower total cost of ownership for customers
- Active Feed Technology on S2000 reduces prep work for busy office workers and let them focus on their customers or business
- Controlled Stacking reduces the mess in output normally caused by faster straight through path scanners like Fujitsu Fi Series and saves time enhancing productivity
- Color User Interfaces makes it easier to use and more intuitive
    - Wireless & Network models offers Significant advantages, Fujitsu has no option in departmental scanners
    - Shared Device, Can be connected to any Host Device – PS, Tablet, Mobile
    - Zero Footprint Driver-Less Scanning means lower cost of ongoing management
- EasySetup for secure centrally managed one touch setup
- Easy Access Integrated Flatbeds yet Optional, customers can scale based on their needs they don't have to buy factory set scanners at much higher cost for Fujitsu Fi72xx
- Faster throughput for similar priced products
- SNMP Support on Network models not available on Fi Series

Alaris S2000 vs Canon M1x0

COMPETITIVE

Top reasons to buy vs Canon M1x0ii

- Fully Embedded Image Processing on Alaris S2000 means lower total cost of ownership for customers
- Active Feed Technology on S2000 reduces prep work for busy office workers and let them focus on their customers or business
- Controlled Stacking reduces the mess in output normally caused by faster straight through path scanners like Canon M1x0ii and saves time enhancing productivity
- S2000 Dual LED Illumination creates more even images with crumpled / folded documents reducing needs for rescan
- Color User Interfaces makes it easier to use and more intuitive
    - Wireless & Network models offers Significant advantages, Canon has no option in departmental scanners
    - Shared Device, Can be connected to any Host Device – PS, Tablet, Mobile
    - Zero Footprint Driver-Less Scanning means lower cost of ongoing management
- EasySetup for secure centrally managed one touch setup
- Easy Access Integrated Flatbeds yet Optional, Canon has optional Flatbed but is detached / tethered only
- Faster throughput for similar or higher priced products
- SNMP Support on Network models not available on Fi Series

Alaris S2000 vs Epson DS 860 Scanners

COMPETITIVE

Top reasons to buy vs Epson DS 860

- Fully Embedded Image Processing on Alaris S2000 means lower total cost of ownership for customers
- Active Feed Technology on S2000 reduces prep work for busy office workers and let them focus on their customers or business
- Controlled Stacking reduces the mess in output normally caused by faster straight through path scanners like DS860 Series and saves time, enhancing productivity
- S2000 Dual LED Illumination creates more even images with crumpled / folded documents reducing needs for rescan
- Interactive Multi feed Management
- Colour User Interfaces makes it easier to use and more intuitive
- Wireless & Network models offers Significant advantages, Fujitsu has no option in departmental scanners
  - Shared Device, Can be connected to any Host Device – PS, Tablet, Mobile
  - Zero Footprint Driver-Less Scanning means lower cost of ongoing management
  - EasySetup for secure centrally managed one touch setup
- Easy Access Integrated Flatbeds yet Optional, Epson does not have optional flatbeds or flatbed models in this category
- Faster throughput than Epson Scanners

Alaris S2000 Series vs Kodak i2000 Series

COMPETITIVE

- The Alaris S2000 Series will succeed the i2000 Series.
- The new scanners offer driver compatibility, better document handling, a greater image quality, Intelligent document protection and onboard image processing, which enables the scanners to perform better on low powered PC's.
- The S2000 Series can be fitted with three different optional flatbeds: For Passport scanning, up to DIN A4 size, or up to DIN-A3 size documents. The i2000 Series has no passport flatbed, and no integrated flatbeds
- Apart from the new smaller design, the s2000 scanners have a much better document handling.
- The S2000 consume less power, scan documents in color much faster, incorporate an USB 3.1 interface, and are quieter in operation.
- The S2000w Series offer LAN and WLAN connectivity.

Partner Value Proposition with the Alaris S2000 Series Scanner

A flexible scanner platform for growth

The Alaris S2000 scanners isn’t limited to our product offerings and capabilities – this is a platform on which to connect, configure and create new solutions that meet your unique needs.

- Global partner network
- API and SDK tools for system integration, Integrate with legacy applications today and with modern applications in future
- Connect on USB, WIFI or Network with PC, Tablet or Mobile
- Create a powerful capture solution with our full suite of software solutions
- Industry Leading Warranty and World-class support

ALARIS SOFTWARE PORTFOLIO

Add software solutions to the equation - you'll multiply your productivity

Alaris Capture Pro Software

Enterprise Document Capture

- Stand-alone system for departments or bureaus
- Quickly and efficiently convert forms and business documents to high-quality business data
- Enhance productivity with advanced indexing capabilities
- Available as a 1-year subscription in addition to existing perpetual licensing options*

*Not available as a service on Auto Import Edition

Alaris Info Input Portfolio

Web-based Enterprise Capture

- This portfolio of web-based capture solutions allows you to capture using smart devices, scanners, MFDs and email
- Alaris Info Input Solution is ideal for customers who need single platform for distributed and batch scanning environments
- Available as a 1-year subscription in addition to existing perpetual licensing options

Asset Management Software

Dashboard monitoring solution

- Uses a thin-client to help system administrators optimize time, budgets, resources and efficiency
- Know more and do more by managing select scanners from Alaris remotely across a network
- Quickly deploy updates and upgrades in a centralized way

PROFESSIONAL SERVICES

Extending the Advantage

Alaris Professional Services extend the advantage of owning an Alaris scanner and maintaining it with our world-class Repair and Maintenance services.

Expert Professional Services enhance our customer's operational efficiencies and personnel knowledge adding greater value to their information management environment.

Technical Assistance

Alaris assists our customers with their technology needs by providing product installation, product upgrades, device relocation, and scanner setup.

Technology Services

Alaris technology services include diagnostics and configuration of IT systems, and capture adoption services, to serve our customers directly or complement existing customer functions.

Optimization Services

Alaris assesses our customer's information management operations and makes recommendations on how to optimize with expert advice and training.

Consultative Services

Alaris helps our customers improve their processes with our business analysis, solution architecture, and custom integration and development services.
